*end to end solution*

# About Us

- Integrated Packaging & Supply Chain Solution established in 2023 provides end to end supply chain solutions starting from your components to final Finished Goods.
- We aim to optimize component & FG packaging across industry by making it
  - Sustainable
  - Reusable
  - Vehicle friendly
  - Storage friendly
  - Safe, durable & MHE friendly.

# End to End Solution

**Returnable Packaging** – standard & customized returnable packaging solutions.

**Expendable Packaging** - single use packaging for domestic & export shipments.

**On-site Packaging** – experienced team for carrying out on-site packaging.

# Returnable Packaging Solutions

**Plastic Crates & Pallets** – collapsible & non collapsible plastic crates in 600 x 400 footprint & 400 x 300 footprint.

**Pallet Sleeve Box** – Injection Moulded PSB in 1200 x 1000 & 1200 x 800 footprint.

**Foldable Large Container** – FLC & FSC with following sizes 1200 x 1000 x 970 & 1200 x 1000 x 570.

**Customized Steel Pallets** – collapsible & stackable pallets, for bigger & heavy components.

**Foldable Steel Box** – FSB for heavy components packaging with following sizes 1322 x 1037 x 1105 & 1322 x 1037 x 750.

# Primary Packaging Solutions

**PP Inserts & Separators** – PP Inserts & separators can be customized as per parts size & weight

**Corrugation Insert & Separators** – One time use customized corrugation insert & separators.

**Thermoformed/Injection Molded trays** – Thermoformed & injection molded trays are made as per the part profile for fragile and high-volume parts.

**Fabric Dunnage** – customized for fragile parts, which are more prone to scratch

# Benefits of IPSC Returnable Packaging

---

**Customized & Standard Packaging Solutions** – packaging solutions are designed as Customer requirement.

---

**Dedicated inventory for every flow** – boxes are uniquely coded for every flow. Inventory of one flow cannot be used for another flow.

---

**Optimize Freight** – solutions are designed considering the vehicle dimensions/load into consideration to ensure optimum utilization of vehicle load.

---

**Optimize Storage** – solutions are designed to optimize storage. All solutions are stackable to reduce storage space.

---

**Optimize Handling** – MHE friendly solutions, can be handled using forklifts, HOPT & BOPT.

---

**Line friendly Solutions** – if required solutions can be designed to directly feed the customer line.

# Metal Storage Pallets

Light Weight & Heavy-Duty pallets are designed to replace conventional wooden & plastic pallets.

MHE friendly pallets, can be handled with forklift & hand pallet. Easy for storage & handling.

Pallet weight starting from 14.7 kgs for 1-ton capacity. Can be customized for 2-ton, 3-ton capacity.

High life & low maintenance cost.

Compatible with ASRS storage system.

Standard pallets available in 1200 x 1000, 1200 x 1200, 1000 x 1000 mm. Customized size available as per customer requirements.

# Expendable Packaging Solution

**Wooden Pallets & Crates** - wooden pallets & crates for domestic & export packaging.

**Corrugation Boxes** with internal inserts & separators.

**Sea-Worthy Packaging** – high quality sea-worthy packaging to ensure safe delivery of products.

**On Site Packaging** – on-site domestic & export packing solution

# Trolley & PP Bin Fabrication

---

**Metal Trolleys & Pallets** - Design & Fabrication of metal trolleys.

---

**PP Bins** - Design & Fabrication of PP box & internal fitments.
